

TEST DETAILS:

123 Sample St.

Hiawatha, IA 52233
Linn

U.S.

John Doe
319-213-0228
livingstontimmerman@yahoo.com

Test Start Date/Time: Tuesday, August 29, 2017 // 12:00 PM

Test End Date/Time: Friday, September 01, 2017 // 7:00 AM

Location of Instrument: Basement bedroom 1.2ft from opposite wall of windows

Notes: EPA EXPLANATION OF TEST RESULTS

Radon is a radioactive gas that comes from the natural breakdown of uranium in soil. Radon is the second leading cause of lung cancer, after smoking. The concentration of radon is measured in pico-curies per liter of air (pCi/L). The U.S. Environmental Protection Agency (EPA) and the Surgeon General strongly recommend taking further action when the home's radon test results are 4.0 pCi/l (pico-curies per liter of air) or greater. Radon levels less than 4.0 pCi/l still pose some risk and in many cases may be reduced. The higher a home's radon level, the greater the health risk to you and your family. Smokers and former smokers are at especially high risk. EPA recommends that you use an EPA or State-approved contractor trained to fix radon problems. You can call your state radon office to obtain information, including a list of EPA or State-approved radon contractors who can fix or can help you develop a plan for fixing the radon problem.

Additional testing should be done if any of the following criteria is met:

- A mitigation system is installed (No sooner than 24hrs -No less than 30 days)
- Occupancy by a new owner
- Two years since the previous test
- A new addition is added
- An alteration is made that could change the ventilation pattern
- Major cracks or penetrations occur in the foundation walls or slab
- Change in living conditions such as using or remodeling a basement
- Changes are made or happen to an installed mitigation system
- Occupation of a ground contact area that was not previously tested

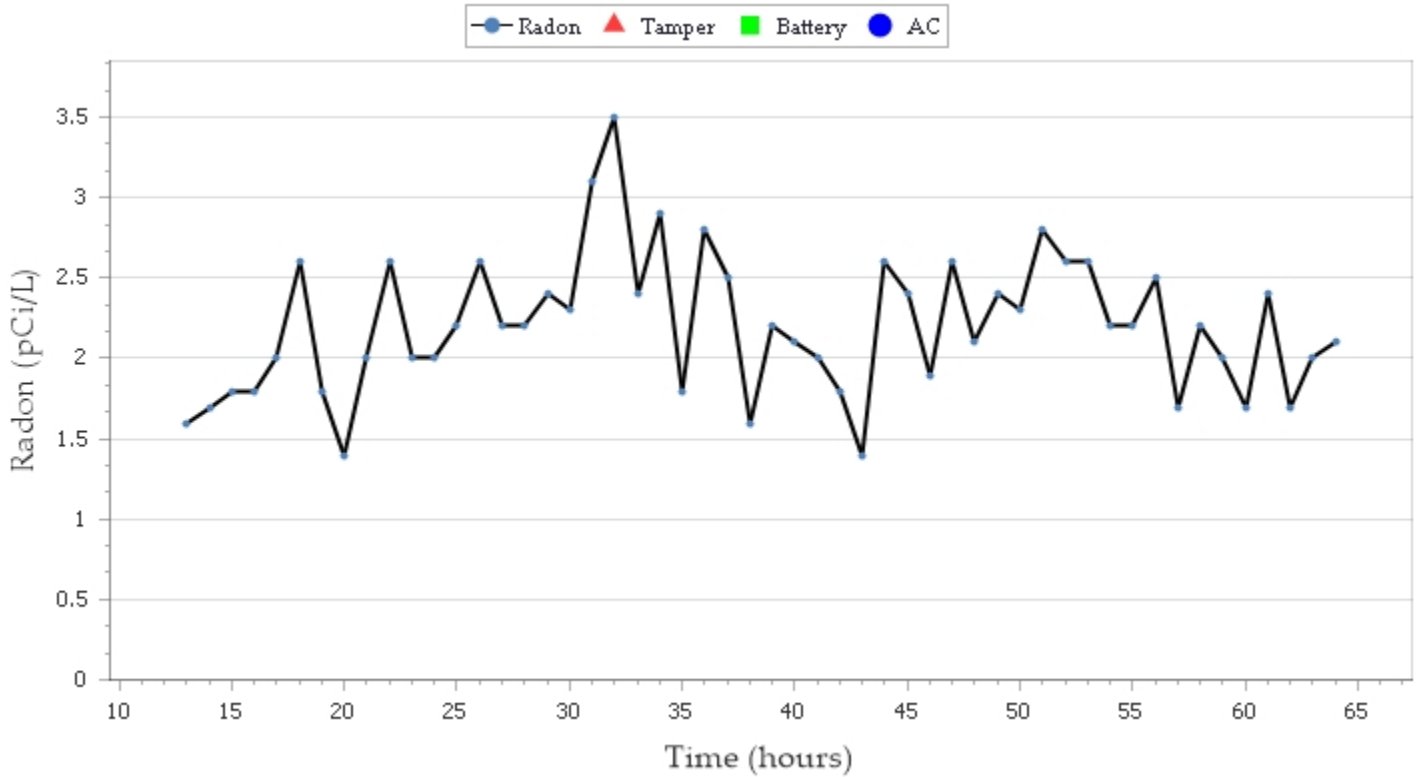

For more information please see attached document(s). (EPA, A Citizens Guide to Radon [2nd Edition]) and/or the (EPA Home Buyers and Sellers Guide to Radon)

Responsible Party agreed to closed house conditions during test. Also, Responsible Party agreed to closed house conditions 12 hours prior to test or test was delayed 12 hours due to closed house conditions not being met.

TEST RESULTS:

Average: 2.1 pCi/L

Test ID# 30008
